Truck Loading Using an Autonomous End-Loader

Senior Project Spring 2008

Kevin Hurley

Ryan Leman

Bradley University

EE 452: Senior Laboratory

Advisor: Dr. Schertz

Overview

Overall System Block Diagram

Overview

- Project Overview
- Project Goals
- Original Schedule
- Accomplishments
- Next Steps
- Updated Schedule

Project Goals

- Hardware
 - Determine and Mount Sensors
 - Pile and truck identifiers
 - Distance sensors
 - Speed and vehicle distance
 - Direction/compass
 - Drive Electronics
 - Design and Implement Circuitry

Project Goals

- Software
 - Locate Pile
 - Navigate to Pile
 - Scoop a Load
 - Locate Truck
 - Navigate to Truck
 - Dump load in Truck

Overview

- ❑ Project Goals
- ❑ **Original Schedule**
- ❑ Accomplishments
- ❑ Next Steps
- ❑ Updated Schedule

Task Schedule

| <u>Lab Period</u> | <u>Overall Tasks/Goals</u> | <u>Kevin</u> | <u>Ryan</u> |
|-------------------|----------------------------|---|---------------------------|
| 1/29 | sensor mount and test | vehicle modification | vehicle modification |
| 2/5 | sensor mount and test | drive electronics | sensor installation |
| 2/12 | sensor mount and test | drive electronics | sensor installation |
| 2/19 | hardware | circuit board mounting | circuit board mounting |
| 2/26 | hardware | testing | testing |
| 3/4 | software | pwm generation | interpret sensor data |
| 3/11 | software | pwm generation | find truck or pile |
| 3/25 | software | navigate to pile or truck | navigate to pile or truck |
| 4/1 | software | scoop/dump | scoop/dump |
| 4/8 | debug/test | testing | testing |
| 4/15 | debug/test | debugging | debugging |
| 4/22 | debug/test | debugging | debugging |
| 4/29 | final presentation prep | Final Presentation and Report Preparation | |
| 5/6 | final presentation | Final Presentation | |

Overview

- ❑ Project Overview
- ❑ Project Goals
- ❑ Original Schedule
- ❑ Accomplishments
- ❑ Next Steps
- ❑ Updated Schedule

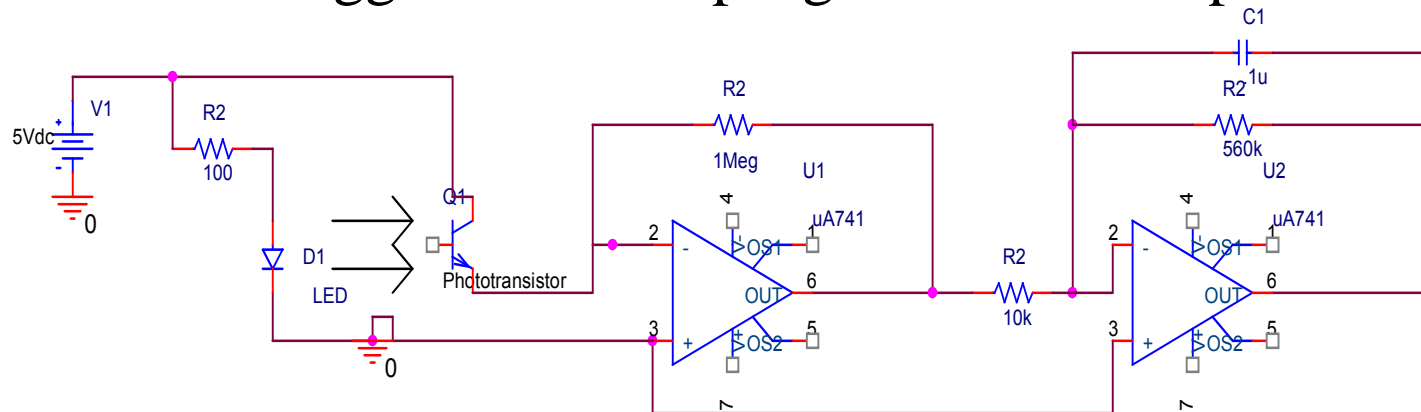

Ultrasonic Sensor

- ❑ SRF05 Ultrasonic Sensor
- ❑ Output is a pulse – the width in $\mu\text{s}/148 =$ inches to object
- ❑ Accurate to around 4 feet, down to less than half of an inch
- ❑ On-board Testing

Infrared Beacons and Transistor

- ❑ Current to Voltage Converter
- ❑ High gain with LPF to limit noise amplification
- ❑ Increased range to 3 feet
- ❑ On-board Testing
 - Location
 - Shielding
- ❑ Schmitt Trigger to clean up signal to TTL output

Vector V2X Digital Compass

- ❑ Direction to approach truck and load from
- ❑ Outputs pulse train based on clock output
- ❑ Accuracy Testing
- ❑ Mounting location

Infrared Reflective Sensors

- ❑ Current sensor (HOA010149-1) is smaller than original sensor - QRB1134
- ❑ Printed pinwheels to mount on wheel
- ❑ Schmitt trigger to clean up signal to TTL output
- ❑ Mounting location investigation

Vehicle Bucket Sensors

- Limit sensors included on vehicle will be used to stop bucket movement at limits
- AND the sensor output with the bucket drive command signal

Drive Electronics

- L293 Quad Half H-Bridge
- Allows control of motors with 0-5V PWM
- Outputs high current 7.2 V from battery to drive motors

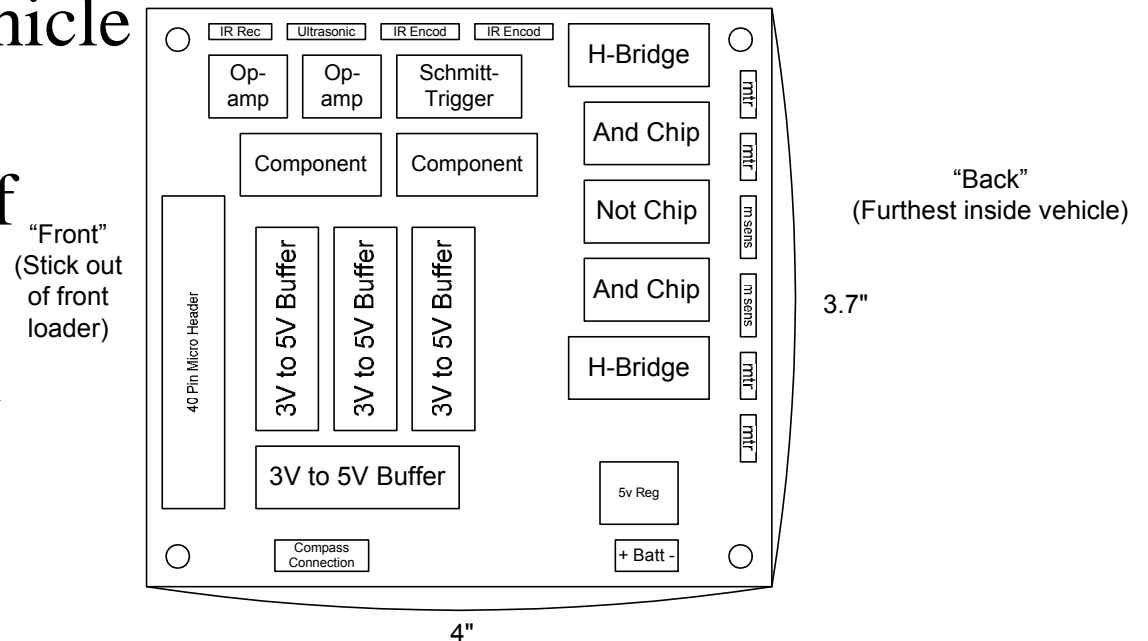

Voltage Regulation

- 4245A Bidirectional Translator
 - 3.3V to 5V
 - 5V to 3.3V
- MC7805 Voltage Regulator
 - 7.2V to 5V

Circuit Board Layout

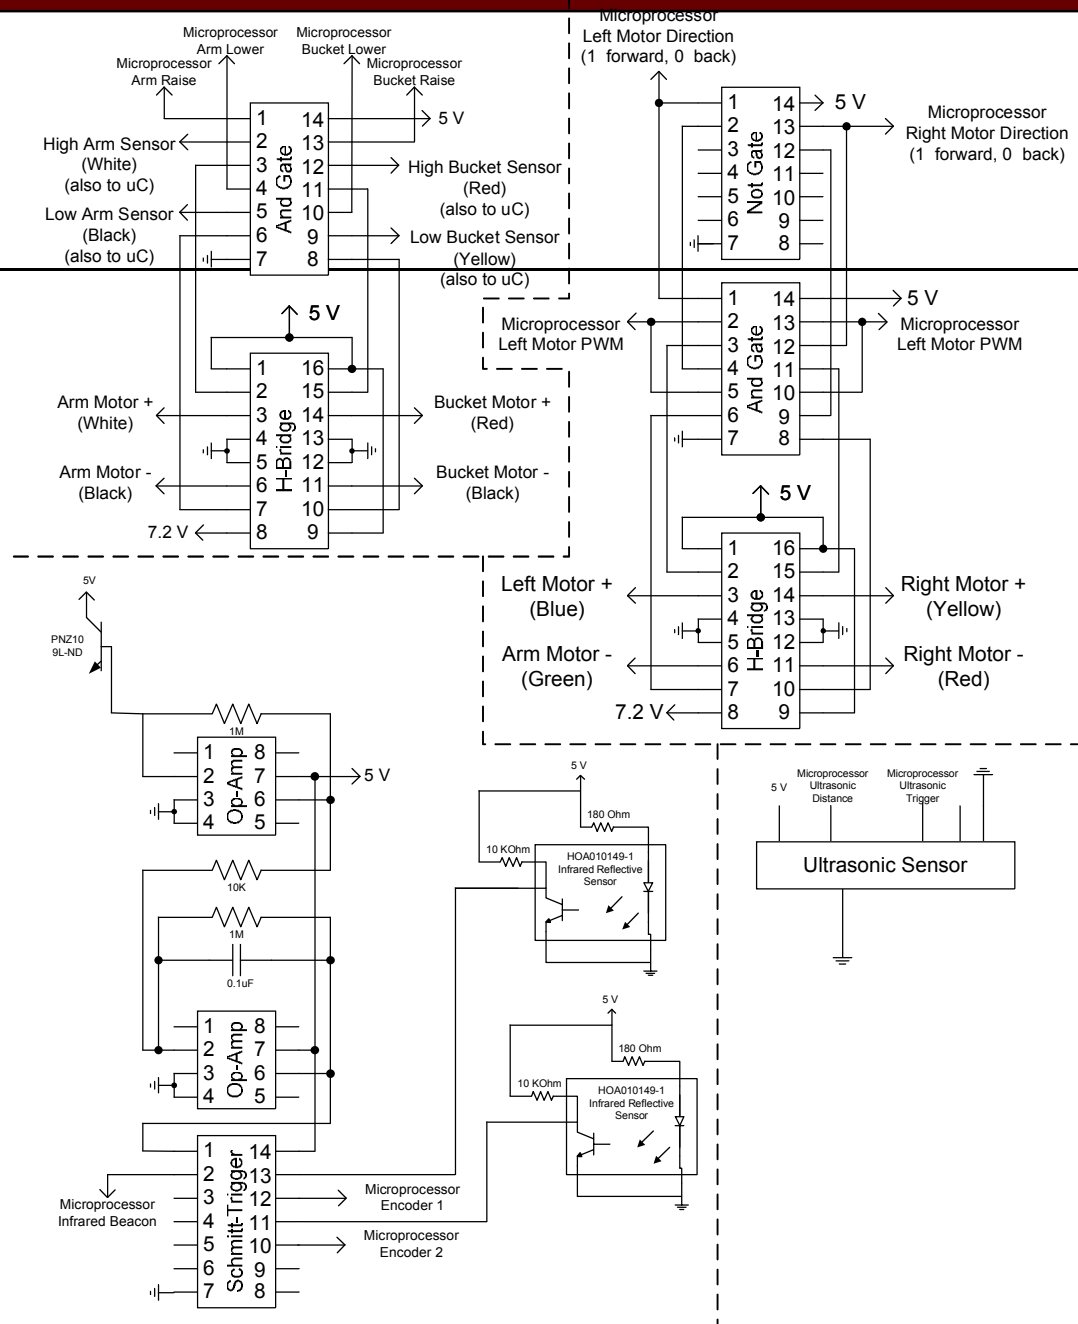

- ❑ Designed board similar size to microprocessor
- ❑ Will be mounted inside modified cab of vehicle
- ❑ Compass mounted separately on top of cab
- ❑ Wire wrapping and soldering is nearly completed

2 Boards:
Board 1: 4" X 3.7"
Board 2: 2.5" X 2.5"
Mounting holes shown in corners, not to scale

Circuit Board Layout

Overview

- ❑ Project Overview
- ❑ Project Goals
- ❑ Original Schedule
- ❑ Accomplishments
- ❑ *Next Steps*
- ❑ Updated Schedule

Next Steps

- Complete circuit board
 - Wire wrapping
 - Mounting
 - Final testing
 - Circuitry
 - Motor effects on compass
- Sensor mounting in previously determined locations
 - Ultrasonic
 - Infrared Sensors
 - Reflective Sensors

Next Steps

- Software
 - Locate Pile
 - Navigate to Pile
 - Scoop a Load
 - Locate Truck
 - Navigate to Truck
 - Dump load in Truck
- Debug and Test
