Jared has begun working with Brittany on the E-pucks, and together they managed to successfully un-brick one of the E-pucks. They have also looked in a following a color algorithm as well as Bluetooth communication between the E-pucks. During this week, Greg and Ryan tested circular movement. One QBot spun in a small circle, and another Qbot followed first. The “To Host File” Simulink block was implemented as it works better than the “To Workspace” block. The object avoidance subsystem was started and will be a priority going forward.
